  - a. Brendan updated the Commission on research into electrical aggregation. The usage profile and market prices do not create the opportunity to aggregate accounts for the purposes of getting lower pricing. NIMEC did respond with an alternate that would allow for 100% green energy sourcing but would split the aggregated accounts between ComEd and other suppliers with the economic benefit of some accounts being used to offset the cost of purchasing RECs for those remaining with ComEd.
  - b. ICLEI – no discussion – removed from agenda. Left on in error.
  - c. Facebook – There are 339 followers on Facebook. Posting ideas were discussed including Morton Arboretums video on tree and shrub watering and recycling correctly. There was very good response to several posts in the last month.
  - d. Future Articles for Publication – David will pursue an article regarding the green efforts underway by Sisters of Saint Joseph related to demolition. Jeff Nee will pursue the solar aspect of their project. Go Ape is another item to be highlighted.
